Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Language such as: "can either be" "or" "if can be" should be eliminated from the claims because this language renders the claim indefinite and unclear. Claim language should not be vague, optional or written in the alternative, but definite and precise.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3654

1. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davidson US-4050728 in view of Rudy US-2697642. Davidson discloses a shovel with base plate 38 that is elongated with two 90 degree bends and clamped to the main shovel shaft by clamps 32; the auxiliary handle 10 is adjustable to different lengths via telescopic inner tube 16; the hinge 42 is bolted to the base plate by screw 44 and the hinge is secured to the auxiliary handle by bolts 47.

Davidson includes a spring clip 34 on the main handle to secure the auxiliary handle to the main handle when not in use. Davidson does not include a metal attraction plate bolted on the auxiliary handle and a magnet bolted on the main handle. Rudy US-2697642 discloses a magnet 14 included on handle 10 to secure either a broom or mop end including an attracting magnet (see figures 1 and 6). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the handles of Davidson to include magnets in order to hold the handles together when the shovel is not in use so that the shovel could be stored compactly.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Davidson.

Davidson discloses a hinge 42 connected to the base plate 36 with one bolt 44 to swivel

Art Unit: 3654

up and down; the hinge has two holes (see figure 2) where it can be bolted to the base plate and a means for attaching the auxiliary handle to the hinge including straps 45 and bolts 47; the base plate 36 is flat at the upper region; the hinge 42 enables the auxiliary handle to rotate left and right, up and down, but not clockwise or counterclockwise as seen in figure 1.
